Jaspell Jaldi is ideal for school, home, or business!

Jaldi—a fast, easy touch-typing method for quality multilingual documents, using standard keyboard, PC, Windows®.

This software is in use in schools, local authorities, hospitals, translators, publishers, other businesses, and with private individuals. Many of whom have come back for further copies and recommended the software to their colleagues and friends.

The Roman family of scripts (Latin1-4, Vietnamese, and Mandarin Chinese in Pinyin) facilitates special characters and accents like åáãäääæçñðß. These do not require the memorization or use of numerous complex, awkward, slow key combinations.

The typing system for Asian scripts has continued the same since 1995. Although various typing and mouse methods are provided, the quickest way is to type the Romanized form of the foreign word (e.g. paanii, saalaam, kitaab, dharma).

The word processing features have been progressively enhanced with a wide range of word processing features which include easy mixing of languages; mail merge; use of graphics and tables; view zoom; font styling and many other features expected of a good Windows® package. Tables allow each cell to have mixed styles and scripts typed directly into them. That is especially helpful for making documents that list words or phrases in different languages.

TOUCH TYPE	Maximum efficiency, minimum stress	DIRECT	Single key press (not need CTRL or ALT)
KEYBOARD	Standard keyboard, no overlay required	EASE	Each sound has a unique standard key input
KEY GUIDES	You can show a key or alphabetical guide	METHOD	Similar method for many languages
LANGUAGES	Mix English and Asian languages quickly	HEAR	Characters, syllables, (Japanese) text aloud
FONTS	Automatic selection of font for each script	INSERT	Insert any Windows character instantly
UNDO	Previous actions can be undone.	DISPLAY	Accurate WYSIWYG display
COLOURS	Characters in many different colours	SCALABLE	Font size from 5 to 512 point (A4 high)
STYLES	Mix bold, italic, u'line, strikethru, super, sub	CAPTIONS	Headers, footers, date, time, file & page No.
FORMAT	Set page, paragraph, line, margins and tabs	SEARCH	Find and replace selected blocks of text
CLIPBOARD	Standard Windows cut, copy and paste	TABLES	Create and resize tables, add rows, columns
GRAPHICS	BMP, TIFF, WMF, PNG, JPEG and GIF	CELLS	Each with mixed scripts, formats, gridlines
OBJECTS	Insert various Windows objects like Paint	FRAMES	Varied lines around paragraphs
FIELDS	Multiline fields for data insertion	HYPERLINKS	Internal and external links and jumps
MERGE	Insert addresses, etc. into forms	HEADFOOT	Headers and footers on first and other pages
MULTIPLE	Up to 4 documents opened at once	ZOOM	10% - 400% scaled display on screen
PREVIEW	Full page view before printing	PRINT	Full quality Windows control
COLUMNS	Type into multiple columns	BORDERS	Arrange border lines around your pages
MEMORY	Management handles large files	EXCHANGE	RTF, DOCX, DOC, HTM, TXT
WORD COUNT	Report words, characters, spaces	EXPORT	PDF documents with fonts embedded, or HTML
LEARNING	Helps use sounds, charts, exercises, demos	AUTOTYPE	Plain text input stream compiles hands off
SYSTEM	32-bit: Microsoft Windows 95 or higher; 9 Mb hard disk, CD or 1.44Mb floppy drive; Mouse (optional) 64-bit: Microsoft Windows7, etc.
